

Prashul Jain

Senior Software Engineer | Systems UX & AI Tooling

Nagpur, India · +91-9406707245 · jainprashul@gmail.com · Portfolio · LinkedIn · GitHub

SUMMARY

Senior Software Engineer (R&D UX) building operator-facing systems for cloud-native enterprise networking. I turn static configs, fragmented workflows, and raw telemetry into tools engineers can reason about—across React/TypeScript UIs, Go services, and Kubernetes packaging. Focused on AI platforms, infra visualization, realtime SaaS performance, and developer automation.

EXPERIENCE

Senior Software Engineer, R&D UX — Highway9 Networks

Jul 2022 – Present

Saratoga, CA (remote from India)

- Own end-to-end R&D UX for a cloud-native enterprise networking SaaS—React/TypeScript frontends, Go services, and Kubernetes/Helm packaging across operator workflows.
- Lead AI Assistant platform work: modular architecture across environments, JWT principal-based auth, ACL/role access (vs global flags), and audit attribution for assistant-driven actions.
- Build AI Grid / infrastructure product surfaces—clusters, node pools, storage, live metrics, app catalog flows, log viewers, and k8s describe/runtime sync for operators.
- Design Helm and Kubernetes visualization tools that turn chart configs and live cluster state into interactive graphs for debugging complex deployments.
- Harden realtime SaaS performance: optimized WebSocket entity-patch pipelines, fixed Google Maps teardown leaks causing multi-second main-thread stalls, and reduced chart/map re-render waste.
- Ship developer automation including OpenCode PR-review GitHub Actions on self-hosted runners—structured review output, comment dedupe/suppress, and safer publish permissions.
- Partner with product and platform teams to turn ambiguous infra/AI requirements into production systems spanning UI, auth, and API layers.

App Innovation Consultant — Neudesic (IBM)

Mar 2022 – Aug 2022

- Served as lead React developer alongside a .NET Core backend team; designed UI/UX and implemented production interfaces from wireframes.
- Defined project structure, data modeling, and state management from scratch; mentored junior developers.

SAP HANA Consultant — Cognizant

Jan 2020 – Mar 2022

- Built and optimized HANA views, calculation views, and SQL procedures on a shared SAP financial data platform integrated with external applications.
- Led data migration work and contributed to automation testing/monitoring for reliability and reporting.

Freelance — Web & Cross-Platform Apps

Early career

- Delivered client web and cross-platform apps end-to-end: requirements, data modeling, UI/UX, and business logic.

SELECTED WORK

AI Assistant & OpenCode (Highway9) — Architecture, auth/ACL, audit attribution, and PR-review CI automation for assistant-driven engineering workflows.

AI Grid / Infra Visualization (Highway9) — Cluster, node-pool, and storage UX with live metrics; Helm → interactive system graphs for infrastructure reasoning.

Cloud Shell & Realtime SaaS UX (Highway9) — Terminal/shell redesign and performance work on WebSocket sync, Maps, and analytics widgets under load.

Crafttor — Adobe Creative Cloud Plugin — Contract plugin for asset management with auth, backend integration, and React/Redux UI.

Billin’ Inc — Invoicing & Accounting — Invoicing, accounting, and inventory PWA for SMEs (Node.js, TypeScript, React, Express, Electron).

SKILLS

Languages	TypeScript, JavaScript, Go, Node.js
Frontend	React, Redux, WebSockets, HTML/CSS, UI systems / design systems
Backend & Data	REST APIs, JWT/auth, ACL & principals, NoSQL, SQL
Infra & DevOps	Kubernetes, Helm, Docker, GitHub Actions, AWS, GCP
Practices	Systems UX, performance profiling, CI automation, technical specs

EDUCATION

B.E. Computer Science — Priyadarshini College of Engineering · Jul 2015 – Aug 2019 · GPA 7.9 · Technical Writer, Forum (SCOOP)

CERTIFICATIONS

The Complete Node.js Developer Course (3rd Edition) — Udemy

Docker and Kubernetes: The Complete Guide

SAP Certified Application Associate — Business Intelligence with SAP BW

AWS Essentials
